REPLY TO  
ATTN OF: OCC:TSH

SUBJECT: Issue Paper Prepared for the Office of the Assistant Manager for Environmental Restoration

TO: Steve Slaten, Interagency Project Coordinator, Office of the Assistant Manager for Environmental Restoration

As you know, the regulators in January 1995 requested an issue paper from the department with regard to the general applicability of the Colorado groundwater site-specific regulations as potential Applicable or Relevant and Appropriate Requirements (ARARs). This office, at the request of the Assistant Manager for Environmental Restoration, has prepared the enclosed issue paper regarding this matter. The issue paper may be forwarded to the regulators at your convenience.

Points of contact in this office on this matter are Mike McCann (NFTI, Legal and Regulator Compliance Specialist) and the undersigned. If you have any questions, Mr. McCann may be reached at X5660 and I may be reached at X2027.

  
Timothy S. Howell  
Environmental Counsel
